[image=636x636,link,left,size,dummy] Should I Put On My Resume If I Want to Be an IT Manager? November 1, 2012 Finding a career that is both challenging and satisfying is the dream of a lot of people. These days, with the economy still shaky, you may be wondering if you should consider going into computer science or some other technical field. While many IT managers have reached the top levels of their careers, there are a great number of others who still work at lower levels and enjoy their jobs. Whether you are just starting out or you have been a computer programmer for a few years, your resume should show what you know about the field. What should you put on your resume if you want to be an IT manager? With so many different job opportunities in the IT field, you may not know what to put on your resume if you want to be an IT manager. However, you should be able to tell your potential employer that you have a minimum of experience in the field. The following are some of the IT job responsibilities that you should be able to mention on your resume: You should know how to create a project plan You need to be able to research and learn all aspects of your job You need to be able to explain the details of your job to new employees You need to be able to work efficiently You need to be able to present to new employees You need to be able to explain technology to your team members You need to be able to be able to present to new employees You need to be able to explain technology to your team members You need to be able to b
